We hereby submit specifications and estimates for:

Roof Repair Work

The following are the most severe areas needing work now.

1. Repairing the perimeter edge pulling roof membrane. We will cut the roof membrane loose at the roof edge. We will remove the existing perimeter gravel stop edge metal. We will install a new extension piece of EPDM rubber spliced to the field roof membrane. We will run the extension rubber over the wood nailer and roof edge and fasten it to the face of the wood nailer. We will re-install the gravel stop edge metal nailed over the rubber and wood nailer. We will flash the flange of the edge metal into the roof with new EPDM rubber cover strip flashing. Area approximately 560'. Cost for No. 1 -
2. Repair bridging and pulling wall flashing on 2 low roofs. We will cut the roof membrane loose at the base of the wall. We will install a new re-enforced anchor strip at the base of the wall fastened with screws and plates, 12 inches on center. We will splice an extension piece of EPDM rubber to the existing field rubber and adhere to the new re-enforced anchor strip and to the wall. Area approximately 50'.
Cost for No. 2 -
3. Repair bridging flashing on 1 skylight roof curb and 2 roof top unit curbs that are pulling. We will do the same procedure as No. 2. Cost for No. 3 -
4. Patch void in corner of roof, seal void in lap of rubber and move rock back in 2 corners and install concrete pavers in corner. Cost for No. 4 -

We propose to furnish material and labor – complete in accordance with above specifications, for the sum of:

Please see above

Payment to be made as follows:

NET DUE TEN DAYS FROM INVOICE DATE.

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays beyond our control. Owner to carry fire, tornado and other necessary insurance. Our workers are fully covered by worker's compensation insurance.

Authorized Signature

William E. Livengood

NOTE: This proposal may be withdrawn by us if not accepted within 30 days.

Acceptance of Proposal: The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

We hereby submit specifications and estimates for:

The following are additional repairs of vulnerable areas that could start having problems.

1. Strip in repair of all roof field seams (laps). We will move the river stone off of the roof seam area. We will power wash clean the roof over the seam area. We will prime this area. We will install and adhere new 5" EPDM cover strip over the roof seams. Approximately 660' of seams. Cost for No. 1 -
2. Strip in repairs of seam (lap) at the base of all roof penetrations and roof curbs. Total for No. 2 -

The cost of a new roof will vary depending on what type of roof, and if additional insulation is added, and other factors. See enclosed proposal for 2 options for roof replacement.

We propose to furnish material and labor – complete in accordance with above specifications, for the sum of:

| PROPOSAL SUBMITTED TO Acme Recreation Center | PHONE 222-2222 | DATE |
| STREET 123 Green Lane | JOB NAME New Roof, Option 1 | |
| CITY, STATE and ZIP CODE Husker, NE 64259 | JOB LOCATION Same | |

We hereby submit specifications and estimates for:

A new Firestone 45 Mil loose laid ballasted rubberguard membrane roof system. The roof area included in this proposal is approximately 9862 square feet.

We will move the river stone aside and tear off the existing roof membrane down to the existing roof insulation and remove the debris. If any deteriorated deck or insulation is found, it will be brought to the attention of the owner and repaired on a time and material basis, as requested. No work will be done unless specifically authorized.

Over the existing roof insulation, we will install ½ inches of fiberboard insulation. Wood nailers will be installed at the roof edge to match the insulation height.

We will then install a new Firestone 45 Mil ballasted EPDM membrane roof system according to the current manufacturer's specifications and details. Reinforced perimeter strip or metal batten strips will be installed at all vertical walls and curbs according to the manufacturer's details.

The roof perimeter will receive new prefinished gravel stop metal flashed into the new roof system according to the manufacturer's current published details. The metal will be anchored and caulked to provide a water tight system. No painting is included in this proposal. All new pitch pans will be installed around roof penetrations, as needed. Installation and sealing of the pitch pans will be according to the manufacturer's printed details.

We will reuse the existing river stone to cover the new roof.

We propose to furnish material and labor – complete in accordance with above specifications, for the sum of:

Payment to be made as follows:

NET DUE TEN DAYS FROM INVOICE DATE.

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. We hereby submit specifications and estimates for:

A new Firestone 60 Mil fully adhered rubberguard membrane roof system. The roof area included in this proposal is approximately 9862 square feet.

We will remove the existing river stone and roof membrane down to the existing roof insulation and remove the debris. If any deteriorated deck or insulation is found, it will be brought to the attention of the owner and repaired on a time and material basis, as requested. No work will be done unless specifically authorized.

Over the existing roof insulation, we will install ½ inches of high density fiberboard insulation. The insulation will be attached to the roof deck with Firestone approved fasteners. Wood nailers will be installed at the roof edge to match the insulation height.

We will then install a new Firestone 60 Mil EPDM membrane roof system according to the current manufacturer's specifications and details. The new roof membrane will be fully adhered to the roof insulation with Firestone bonding adhesive.

Reinforced perimeter strip or metal batten strips will be installed at all vertical walls and curbs according to the manufacturer's details. All vents, stacks and drains/scuppers will be flashed according to the manufacturer's details.

We propose to furnish material and labor – complete in accordance with above specifications, for the sum of: **Please See Terms On Pages 1 and 2.**

Payment to be made as follows:

NET DUE TEN DAYS FROM INVOICE DATE.
